

Prefabricated Modular Units And Custom Containerization

- Can be used as single unit, multiple side by side unit or two story unit
- Simple knockdown style structure
- All panels are 1.38 inches thick with a urethane core, good for both insulation and noise reduction
- Easily change the position of doors and windows during installation as well replace them if damaged since all panels are easily removable
- Transportation cost is minimal since 4 units can be moved by a truck
- Space for storage is minimal
- Forklift pockets are installed for easy handling and transportation
