

EARL PRECISION MANUFACTURING'S CUSTOM CONTAINER INTEGRATION AND OUTFITTING

Earl Precision Manufacturing's Custom Container Integration and Outfitting capability was established in 1992 to support the growing habitability requirements of the US Navy, US Coast Guard and continental US Shipbuilding and Repair Industries.

By using steel Standard ISO Shipping Containers as a beginning point for modification, our custom containers are, in turn configured to provide years of reliable service for the full spectrum of demanding 30+ year life cycles, specific mission requirements and virtually any conceivable land or sea environment.

No matter what the need... To Live In, To Work In, To Support Infrastructure or To Package Kits, Earl Custom Container Integration and Outfitting will provide Excellence, On Time, On Budget.

To learn more about Earl-Industries and our custom containerization capabilities visit us at www.earl-ind.com.
